PROFILE

Computer Science and Engineering (Data Science) undergraduate with hands-on experience in software development, database systems, and academic projects. Skilled in Python, SQL, and problem-solving, with a strong interest in data science and emerging technologies. Passionate about applying software engineering and emerging technologies to develop efficient, scalable, and impactful solutions.

EDUCATION

Sahyadri College of Engineering and Management,Adyar,Mangalore
Bachelor of Engineering in Computer Science & Engineering (Data Science) 2022–2026
CGPA: 7.52

St.Philomena Pre University College, Puttur
State Board – PCMB: 68.66% 2020–2022

Bethany English Medium High School,Darbe,Puttur
State Board – SSLC: 73.12% 2017–2020

INTERNSHIP

LogicHive Solutions Private Limited: Completed a Technology Intern internship at LogicHive Solutions Private Limited, gaining practical experience in backend software development and embedded systems projects. Contributed to the development of backend APIs, database management, semantic search implementation, and REST API integration using modern technologies. Strengthened skills in Python, FastAPI, PostgreSQL, Qdrant, Docker, and data handling while working on projects including a 3D Model Query and Annotation System and a Wireless Joystick Communication System.

PROJECTS

- 3D Model Query and Annotation System: Built a backend system using Python, FastAPI, PostgreSQL, and Qdrant for storing, searching, and annotating 3D models. Implemented REST APIs and semantic search for efficient data retrieval.
- Optimizing Poultry Farming Using IoT and Machine Learning: Developed an IoT-based poultry monitoring system with Machine Learning for environmental monitoring and automation. Integrated ERP features for inventory, livestock management, and real-time dashboards.
- Voice-Authenticated Secure File System: Developed a secure file system with voice authentication. Added AI-based speaker recognition and threat detection for improved security.

TECHNICAL SKILLS

- Programming Languages: Python,SQL, Java
- Web Technologies: HTML, CSS
- Frameworks & Libraries: FastAPI,Flask, React.js
- Databases: PostgreSQL, MongoDB,Oracle Database, Qdrant
